KPLAST™ 1044

KPLAST™ 1044 is a non-reactive thermoplastic polyurethane resin designed for use together with nitrocellulose in the production of solvent based flexo and gravure flexible packaging inks and coatings.

Product Specifications	
Appearance	Clear
Solids Content	75% ± 2%
Viscosity (25°C)	1200 - 1600 cps
Color (Gardner)	2 Max
Solvent	25% Ethyl Acetate

Key Features and Benefits

- ✓ Excellent crinkle resistance / flexibility and adhesion
- ✓ Slightly softer than K-Plast 1055

F.D.A Status

Although there is no section directly referring to non food contact inks, reference can be made to other sections of the F.D.A. The composition of KP 1044 conforms to the positive list of the American F.D.A. regulations, Chapter 21, Section 175-105 for laminating adhesives, where the ingredients are separated from the food by a functional barrier.

E.E.C. Status

The individual monomers used in the manufacture of KP 1044 are listed in the Plastics Directive, Section 1, Part 1, 'Authorized Monomers.'

REACH Status

All reactants are REACH pre-registered and as directed to be registered. We have as needed joined the required SIEF's for the reactant. Our only European representative is Info-Care.
